DETAILED ACTION

Introduction

1. Applicants' amendments and remarks filed on 2/2/2010 have been entered. Claim 4 has been amended. Claims 4 and 5 are active.
2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
3. In response to the amendments, the grounds of rejection have been updated as set forth below. Rejections not maintained are withdrawn.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
5. Claims 4 and 5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Specifically, newly added limitation "optionally a coloring agent for color tone adjustment" renders the scope of the claimed invention vague and indefinite, because it redefines an earlier limitation "a coloring agent for color tone correction" as being optional, not a required element. Clarification is required in the next reply.

Rejections Based on Prior Art

Art Unit: 1783

6. Claims 4 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yoshikawa et al. (US 6090473) in view of Ozawa (US 6638624).

Yoshikawa's invention relates to an electromagnetic wave shielding and light transmitting plate suitable for a front filter of a plasma display panel [col. 1, ll. 8-10]. Fig. 6a illustrates an embodiment of the filter comprising successively an antireflective layer 65, a transparent substrate 62A, and an adhesive layer 64 [col. 17, ll. 15-22]. The adhesive layer may include small amounts of ultraviolet absorbing agent, infrared absorbing agent, and coloring agent, etc. [col. 11, ll. 19-22].

For claims 4 and 5, since Yoshikawa's filter is inherently transparent for viewing the plasma display, the base resins used are necessarily transparent. Yoshikawa lacks a teaching of forming a discrete transparent resin layer which consists of a near infrared absorbing agent, and an adhesive layer consists of a coloring agent for color tone correction. However, Ozawa's invention relates to a filter for plasma display panel, and teaches that the filter can have additional layers, such as a near-infrared (IR) absorbing layer, an antireflection layer, and the like. These layers may be provided in an arbitrary order. See col. 15, ll. 27-32. It would have been an obvious modification to one of ordinary skill in the art to modify Yoshikawa with a separate layer, which consists of a near infrared absorbing agent in a transparent resin, between the transparent substrate and the adhesive layer which consists of a coloring agent for color tone correction, as taught by Ozawa. The selection of a known equivalent material based on its suitability for its intended use supported a *prima facie* obviousness determination.

Terminal Disclaimer

Art Unit: 1783

7. The terminal disclaimer filed on 2/2/2010 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of US Pat. Appl. Nos. 10/562,424 and 10/569,512 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Response to Arguments

8. In view of the updated grounds of rejection, since the collective teachings of prior art render the structure and composition of the claimed invention obvious as set forth above, applicants' argument directed to Yoshikawa individually is unpersuasive.

Conclusion

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
